

SHELTER PROTECTION

Outcome indicator

Indicator Phrasing

English: number or % of households whose dwellings incorporate the promoted hazard-resistant measures

French: nombre ou % de ménages dont les habitations intègrent les caractéristiques de résistance aux risques promues

Portuguese: número ou % de agregados familiares cujas habitações incorporam as medidas de proteção contra-risco promovidas

Czech: počet nebo % domácností, jejichž obydlí využívají propagovaná, hazardu-odolná opatření

What is its purpose?

The indicator measures the extent to which the target households applied the recommended measures for making their dwelling less vulnerable to the identified hazards (such as structural improvements in its construction or changes in the dwelling's surrounding environment).

How to Collect and Analyse the Required Data

Collect the data by using the following methods: review of secondary documents (e.g. project reports), interviews with key informants (construction workers/companies, village disaster management committee members, local authorities, etc.) and quantitative survey among a [representative sample](#) of the target population (involving also observations of the conducted measures).

Disaggregate by

[Disaggregate](#) the data by the [wealth](#) category.
