

ACCESS TO SHELTER

Output indicator, Cluster indicator

Indicator Phrasing

English: number or % of target households living in adequate shelters meeting shelter standards as defined by the National Shelter Cluster

French: nombre ou % de ménages cibles vivant dans des abris adéquats conformes aux standards en matière d'abri définis par le Cluster National Abri

Portuguese: número ou % de agregados familiares-alvo que vivem em abrigos adequados cumprindo os padrões de habitação tal como definidos pelo Grupo Nacional de Habitação

Czech: počet nebo % cílových domácností žijících v adekvátních přístřeších odpovídajících standardům národního shelter clusteru

What is its purpose?

The indicator assesses the number (or proportion) of target households living in shelters that meet the standards set by the National Shelter Cluster.

How to Collect and Analyse the Required Data

- 1) List the shelter standards defined by the National Shelter Cluster.
- 2) Use reviews of the project documentation, observations and interviews with key informants to assess the number (or proportion) of targeted households living in shelters which meet the cluster's standards.

Disaggregate by

[Disaggregate](#) the data by the shelter solutions (as defined by the cluster), gender and specific vulnerable groups, such as people with disabilities.

Important Comments

- 1) Also assess the number of target household members living in adequate shelters.
- 2) As much as possible, **follow the National Shelter Cluster's guidance.**
